Rank Territory Value
1 Japan 93
2 Switzerland 92
3 Norway 92
4 Sweden 92
5 Luxembourg 92
6 France 92
7 Canada 92
8 Netherlands 92
9 United Kingdom 92
10 Austria 91

This map shows the ability of the health service of each territory to provide good basic health care to a number of people. The health service quality score for 1997 was applied to the population. The world average score for health service quality was 72 out of 100. This means that the equivalent of 4.5 billion people had access to good basic health care.

The populations with the poorest health care provision live in Sierra Leone and the Central African Republic. The Sierra Leonean health system scored 36 out of 100 - that is half the world average score. Note that only the most basic care is measured here.

• Data are from the World Health Organisation’s 2004 World Health Report.
• Data refer to 1997 where territories were scored on a scale of 0-100, according to whether there was good basic health care.
• See website for further information.

HIGHEST AND LOWEST RANKED HEALTH SERVICE QUALITY

```
Rank | Territory       | Value |
-----|-----------------|-------|
1    | Japan           | 93    |
2    | Switzerland     | 92    |
3    | Norway          | 92    |
4    | Sweden          | 92    |
5    | Luxembourg      | 92    |
6    | France          | 92    |
7    | Canada          | 92    |
8    | Netherlands     | 92    |
9    | United Kingdom  | 92    |
10   | Austria         | 91    |
